

Hello, everyone. My name is Mohamed Amine Ouelhazi, and I'm here to introduce you to MyConsultia, a LegalTech company that supports lawyers with smart digital workspaces

Do you believe

Many lawyers still run their offices like it's the year 2000, not 2025.

Two thousand
twenty twenty five

For example, meet Mehdi, a 36-year-old lawyer in Tunis. He spends over two hours every day on repetitive, manual administrative tasks. He's not alone. The main issues lawyers face include disorganized documents, with 80% spending three or more hours a week searching for files. They also use insecure and untracked communication tools like WhatsApp for clients. On top of that, many lawyers forget important reminders, and with too many clients to track, there's a high risk of confusion and mistakes.

anytime percent

For this

Our solution is MyConsultia. We offer a secure digital platform to help lawyers manage their practice efficiently by centralizing their documents, cases, and communication.

Our solution is built on three core pillars:

Efficiency: We provide centralized document archives for quick search and retrieval, notes linked to each case, and an integrated CRM to manage clients.

Automation: We offer smart reminders for hearings and deadlines, pre-built legal document templates, and automatic reading of scanned documents with OCR.

Security: Our platform has secure digital storage for legal documents, encrypted internal messaging, and controlled access by case and client.

While some competitors exist, our solution, MyConsultia (MC), stands out with unique features like a flexible payment plan, smart reminders, client CRM, and legal document templates.

As you can see myconsultia is not just an idea but

Our MVP is already in development and includes features like a list of hearings and quick actions.

Early adopters

X We've validated our market with positive feedback from 10 pilot customers. They loved our automatic re-adding of scanned documents, smart reminders, and client management features, all of which will save them significant time.

many

Eight hundred thousand

X We have a clear market and revenue model. The total available market (TAM) in the MENA region is over 800,000 lawyers, representing a potential value of 598.4 million TND per year. In our target market, Tunisia, there are over 9,000 lawyers, and our serviceable available market (SAM) is 1.15 million TND per year. In our first year, we project to have about 90 paying users, generating 66,000 TND in revenue. nine thousand 1.fifteen

X We will achieve this with a subscription model offering three tiers:

Basic for 29 TND/month twenty nine

Pro for 69 TND/month sixty nine

Smart for 89 TND/month , eight nine which includes advanced features like OCR and AI assistants.

X Our 24-month roadmap includes launching and gaining early traction. The roadmap is focused on delivering strong AI features and key product innovations every 6 months. We start with solid fundamentals—document automation and reminders—then move fast toward AI-powered legal workflows, secure communication, and regional growth.

we are in legal families and ,

Our team, composed of three law graduates and a software engineering graduate.

X X With our background team and clear vision, we are the best team to build MyConsultia and we are confident that MyConsultia is the future of legal practice management in the MENA region.

Thank you.
